

Armored Fiber Optic Patch cords used are designed for being used in harsh environment, in which the traditional standard fiber optic patch cable can not fit and get good performance. The armored fiber optic patch cable is made with special strong connectors and armored fiber optic cables, it can protect the cable from damage caused by twist ,pressure or rodent bite.

Features:

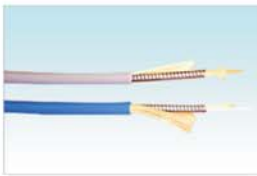

- Steel tape armored inside outer jacket
- SUS flexible armored tube keeps the fiber protected from damage
- Resisting the destroy caused by harsh environment & improper operation such as pull strength
- Pressing, bending, improper twisting and bite of ants or mice
- Secure transmission power to avoid additional attenuation
- Easy and quick for replacement, can be handled as an electric wire
- Telcordia GR-326-CORE Compliant
- RoHS Compliant

Application:

- FTTH Solutions
- Subway
- Telecommunication
- Fast Ethernet & Data communication
- Optical Access and Network Equipment
- Outdoor military use in harsh enviroment
